

Formulex Pharma Innovations – *Your solution for drugs development and clinical manufacturing*

Established in April 2019 and based in Weizmann Science Park, Ness Ziona, Israel, Formulex continues the activities of SoluBest Ltd. in the field of nano-technology based drug delivery and formulation. With accumulated experience based on its proprietary technologies and with an additional know-how gleaned from dozens of partnering and contract formulation projects, we cost effectively generate innovative formulation solutions for challengeable projects for Israeli and global clients in diversified fields, such as biopharma, nutraceuticals, and agrochemicals. The formulation development is accompanied by full analytical support and stability studies.

Formulex has been developing more than 10 medical cannabis products using our patented Solumer™ and generic technologies. Five of the products are in the clinical and commercial stages.

We are able to develop and produce under GMP conditions oral, topical and inhaled dosage forms for clinical phases one and two.

Using Formulex unique formulation capabilities in development of new formulation and new delivery routes for approved drugs you can have the following benefits:

- ✓ Better bioavailability, stability and efficacy
- ✓ Cheaper and easier commercial manufacturing
- ✓ Addressing large unmet needs
- ✓ Quicker and easier regulatory routes
